FRANCESCO GRAULUS EXPERIENCE

EDUCATION

PXL University of Applied Sciences & Arts – Bachelor of Applied Computer Sciences

EXPERIENCE / PROJECTS

03/2020 – 11/2021

Ruby Raffles (https://rubyaio.com/) – A program for entering all kinds of raffles automatically, every aspect was made in house. Important technologies / tasks: React, TypeScript, NodeJS, ElectronJS, NextJS, Reverse Engineering, Firebase, GIT, Github Actions. I sold this application.

10/2020 –04/2021

SwiftSole (https://www.swiftsole.app/) – This company is focused on building applications for the reselling community. I was a full stack developer in the team responsible for building the desktop application that automatically checks out items in the supreme store. Important technologies / tasks: React, TypeScript, NodeJS, ElectronJS, Playwright, GIT, Reverse Engineering.

09/2021 – 01/2022

FlareBots (https://flarebots.com/) - This company is focused on checkout automation for buying "hyped" sneakers automatically for the purpose of reselling them for a profit. I was part of the frontend team responsible for the desktop application. Important technologies / tasks: React, NodeJS, ElectronJS, GIT, Linear.

04/2022 – Now

Nano Studios – This is my web development agency; I create mainly frontend solutions for companies in need. I work together with a designer to create beautiful applications. This ranges from websites to desktop applications to even mobile applications. Important technologies / tasks: React, VueJS, NextJS, React Native, TypeScript, ElectronJS, GIT, Figma.

Some examples: https://refractbot.com/, https://www.vitalmigos.xyz/, SideKicks (https://www.instagram.com/shopsidekicks) User & Staff Dashboard (video: https://streamable.com/f36lgp), and 20+ other projects.
